1

Reclosable top
for transport to
the lab after
sample collection

2

Molded base holds
tip in center of tube
to help avoid loss
of sample material

3

Sterile foam swab
and dry transport
tube in one
convenient unit

WHY PURITAN DIAGNOSTIC SWABS?

We're known in the diagnostic field for **consistent quality – repeatable results – and dependable product availability**. Count on our swabs to deliver exactly what you need out in the field and in the lab.

As always, Puritan responds to market need with high-quality products. We are tuned into the diagnostic/healthcare world. We work hand-in-hand with our customers. By helping you solve challenges, we stay on the leading edge of our industry – creating the best single-use products to assist in reliable specimen collection and accurate diagnoses.

Our PurFlock swabs are a great example. The flock fibers are fully integrated with the handle by our proprietary manufacturing process so there are no heavy adhesives to interfere with bonding or with sample collection. The CDC has recommended sampling be done with synthetic tip materials and our flock swabs are ideal for those applications.

Take a look inside. We offer a large variety of swabs to meet just about any diagnostic need. And, please remember, custom orders are always welcome.

HYDRAFLOCK® AND PURFLOCK® ULTRA FLOCKED SWABS

These patented specimen collection devices produce superior sample collection, rapid elution, and increased test sensitivity by combining a unique microstructure with innovative fibers proven to be more effective than older-style nylon products.

FEATURED SWABS: top to bottom # 3306-H / 3306-U, 3316-H / 3316-U, 3317-H / 3317-U, 3318-H / 3318-U

MAKE PURITAN SWABS YOUR OWN

Take advantage of our **custom options**, including handle color, printing, and variable break points.

HANDLES ARE AVAILABLE IN YOUR CHOICE OF COLORS

The colors shown below are a few that customers have requested in the past. These are just examples – you can request any color you like. Colors make swab differentiation fast and easy – in the field, in the lab, and in diagnostic kits. You can also select a color to match your company or corporate palette.

YOU CAN HAVE THE HANDLES IMPRINTED WITH YOUR LOGO OR TEXT

Customize any of our diagnostic swabs with a signature handle. Provide us with your logo, tag line, text, or other information and we'll imprint it right on the handle. For details about fonts and character counts, please get in touch with us.

Examples:

ANOTHER OPTION FOR YOUR CONVENIENCE

Different applications require different handle lengths. Depending upon how you plan to use your Puritan diagnostic swab, you may have a specific break point in mind. Let us know and we'll build your break point into each molded handle.

PACKAGING QUANTITY CODES

Our packaging codes work from the outside in. The first number represents the outermost package – this may be a case, a box, or other container.

Next is what you'll find when you open the outer packaging – bags, wrappers, tubes, etc.

Finally we get to the heart of the packaging – how many swabs are grouped together. Some examples follow.

10/50 = 10 bags of 50 swabs per bag, per case.

24/30/1 = 24 boxes of 30 swabs with each swab individually wrapped or in a tube.

10/100/1 = 10 boxes of 100 swabs with each swab individually wrapped or in a tube.

HAVE QUESTIONS? CONTACT US.

We are always happy to talk about our products and help you choose those that are best for your applications.
